

TEACHING METHODOLOGY:

Here at BGS CENTRAL SCHOOL we use the best and latest teaching methodologies which help to make learning a pleasure. 'Smart Classroom' technology has been adopted wherein classrooms are equipped with Interactive Boards having information for all classes as per the CBSE curriculum. This audio-visual teaching aid helps to reinforce class room concepts and brings greater clarity of thought and understanding. Students will be taught and tested through this audio-visual medium. Group discussions, seminars, field trips, visits by eminent guest faculty/speakers, and group and individual project work form an integral part of learning at school. Lessons are devised keeping the child in mind and to bring out the best in every child.

While teachers are an authority figure in the classroom, teachers and students play an equally active role in the learning process. The teacher's primary role is to coach and facilitate student-learning and an overall comprehension of material. Student-learning is measured through both formal and informal forms of assessment, including group projects, student portfolios, and class participation. Teaching and assessment are connected; student-learning is continuously measured during the instruction of teachers.
